JACK COLLINS

Senior Platform Engineer

07598 479136

jackcollins1434@yahoo.com

Core Skills

RHEL · Ansible/AAP · AWS · Red Hat Satellite
Monitoring · Vulnerability remediation

Certifications

CompTIA Linux+ (XK0-005)
ITILv3 Foundation in IT Service Management
AWS Certified Cloud Practitioner - previously held; expired

Experience

Senior Platform Engineer Servaada Oct 25-Present

Administer ~500 servers across on-premises infrastructure and AWS, predominantly running RHEL 8 alongside RHEL 9 systems.

Upgraded Red Hat Satellite to version 6.19; administer Content Views, Lifecycle Environments and Capsules.

Rolled out Microsoft Sentinel integration across the Linux estate; contributed a connector script fix merged into Microsoft's repository.

Administer Checkmk and SCOM monitoring; work with internal teams and suppliers to resolve infrastructure issues.

Support AWS migration readiness through Linux validation checks, Ansible automation and technical documentation.

Upgraded AWS QuickSight cost-reporting dashboards to Cost and Usage Report (CUR) 2.0.

Platform Engineer ReAssure Jul 22-Oct 25

Developed Ansible patching automation adopted across 600+ Linux servers, replacing a largely manual process.

Worked with colleagues to integrate patching workflows with Git, Azure DevOps, Ansible Automation Platform and Red Hat Satellite.

Automated maintenance-mode handling, application shutdown, snapshots, reboots and post-patching service checks.

Remediated Linux vulnerabilities using Tenable, Satellite and AWS Trusted Advisor, improving patching and security practices.

Linux System Administrator ReAssure Oct 18-Jul 22

Administered enterprise Linux servers, troubleshooting operating systems, storage, permissions, networking and monitoring.

Used Ansible for repeatable administration; supported AWS infrastructure including EC2, S3, IAM and Lambda.

Enterprise Monitoring Engineer ReAssure Apr 18-Oct 18

Service Desk Assistant ReAssure Nov 14-Apr 18

Training & Development

Currently studying
AWS Certified CloudOps Engineer - Associate (SOA-C03) course content; exam not yet taken.

Red Hat Ansible Automation training

Red Hat System Administration I & II (RH124/RH134)

TCM Security Practical Ethical Hacking

Technical Skills

Linux
RHEL 7/8/9, Red Hat Satellite ≤6.19

Automation
Ansible, Ansible Automation Platform, Git/GitHub, Azure DevOps

AWS
EC2, IAM, S3, CloudFormation, Lambda, Systems Manager, CloudShell, Trusted Advisor, QuickSight, Amplify

Monitoring
Checkmk, SCOM

Security
Tenable.io, Microsoft Sentinel rollout

Scripting
Bash, PowerShell, Python

Documentation & Tools
Confluence, ServiceNow, Hugo, ChatGPT Plus, Motion, Notion, Gamma, Notta
